EDUCATION

KL University

Bachelor of Technology (B.Tech) in Computer Science and Engineering, CGPA: 8.37/10.00

Vaddeswaram, Andhra Pradesh

2024 – 2028

EXPERIENCE

Ethical Hacking Intern

May 2026 – Jun 2026

EduSkills Foundation (Virtual)

Remote

- Successfully completed an 8-week virtual Ethical Hacking internship focused on cybersecurity fundamentals and hands-on security practices.
- Worked with Kali Linux, Linux command-line tools, networking concepts, and basic penetration testing methodologies.
- Performed reconnaissance, vulnerability assessment, and web application security testing in controlled lab environments.
- Studied OWASP Top 10 vulnerabilities, web security concepts, and secure system configuration practices.

Cybersecurity Intern (Ongoing)

Jul 2026 – Present

Elevance Skills

Remote

- Currently learning real-time web application security through structured practical modules.
- Completed networking fundamentals, Web Application Firewall concepts, and OWASP Top 10 training.
- Currently building hands-on experience with Burp Suite for web application security testing.

Web Exploit Hunting & Bug Bounty Intern (Ongoing)

Jul 2026 – Present

EduSkills Foundation

Remote

- Learning responsible vulnerability discovery and bug bounty methodologies.
- Exploring web exploitation techniques, HTTP requests, authentication mechanisms, and common web vulnerabilities.
- Practicing secure vulnerability identification and responsible disclosure workflows in controlled environments.

PROJECTS

Fake Link Detector | *React.js, Node.js, Express.js, JavaScript, Vercel, Render*

2026

- Developed a full-stack phishing URL detection web application to identify potentially malicious websites using URL validation and threat analysis techniques.
- Built a responsive React frontend and integrated it with a Node.js and Express.js backend for real-time URL analysis.
- Implemented REST API communication between frontend and backend to process user-submitted URLs efficiently.
- Deployed the frontend on **Vercel** and the backend on **Render**, enabling public access to the application.

JARVIS AI Assistant | *React.js, JavaScript, Web Speech API*

2026

- Built a browser-based AI assistant capable of responding to voice commands using the Web Speech API.
- Developed an interactive and responsive React interface for seamless voice-based user interaction.
- Designed the application with a modular architecture for future AI feature integration and scalability.

Real-Time Chat Application | *React.js, Firebase*

2026

- Developed a real-time messaging application enabling instant communication between authenticated users.
- Integrated Firebase Authentication and Cloud Firestore for secure login and real-time message synchronization across multiple devices.
- Designed a responsive and scalable user interface to support future feature enhancements.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS

Cybersecurity: Kali Linux, Linux, Nmap, OWASP Top 10, Web Application Security, Vulnerability Assessment

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, Firebase, Postman

Cloud: Microsoft Azure Fundamentals (AZ-900)
